Research Interests

My research interests are at the intersection of data science, machine learning, and complex systems. Many of the questions I ask are motivated by understanding emergent dynamics under evolving real-world constraints. My work has direct applications in urban planning, economics, defense, and other areas of societal impact.

Education

Cornell University — Ithaca, NY 2027
Ph.D., Systems Engineering, Artificial Intelligence
Advisors: H. Oliver Gao, Francesca Parise, Wenfei Xu

Cornell University — Ithaca, NY 2025
M.S., Systems Engineering
Advisor: H. Oliver Gao

Columbia University — New York, NY 2019
M.S., Urban Planning, Urban Analytics
Advisors: Lance Freeman, Kazuki Sakamoto

Harvard University — Cambridge, MA 2012
Non-Degree, Urban Planning
Advisor: Nick Hornig

Arizona State University — Tempe, AZ 2012
B.S. (Hons.), *summa cum laude*, Housing and Urban Development
Advisors: Kevin Kellogg, Michael Underhill, Trevor Barger

Software Packages

GRD-TRT-BUF-4I: Ground Truth Buffer for Idling 2023 - 2027
GitHub [Link] arXiv [Link] Website [Link]

A novel algorithm designed as a series of scalable microservices that detects urban transit bus idling in realtime on global scale. Utilizes a combination of templated ETL pipelines to provide a comprehensive view of the emergent behavior of interfleet idling patterns across multiple transit networks around the world.

SMOGN: Synthetic Minority Over-Sampling Technique for Regression with Gaussian Noise 2021
GitHub [Link] PyPI [Link] Kaggle [Link] Stack Exchange [Link]

A pre-processing algorithm designed to address imbalanced data for regression problems. Conducts over-sampling with traditional interpolation, as well as with the introduction of Gaussian noise. Selects between the two over-sampling techniques by the KNN distances underlying a given observation.

NestedHyperBoost: Nested Cross-Validation for Bayesian Optimized Gradient Boosting 2020
GitHub [Link] PyPI [Link]

Unifies Nested K-Fold Cross-Validation, Bayesian Hyperparameter Optimization, and Gradient Boosting. Designed for rapid prototyping on small to mid-sized data sets. Quickly obtains high quality prediction results by abstracting away tedious hyperparameter tuning and implementation details in favor of usability and implementation speed.

NestedHyperLine: Nested Cross-Validation for Bayesian Optimized Linear Regularization 2020
GitHub [Link] PyPI [Link]

Unifies Nested K-Fold Cross-Validation, Bayesian Hyperparameter Optimization, and Linear Regularization. Designed for rapid prototyping on small to mid-sized data sets. Quickly obtains high quality prediction results by abstracting away tedious hyperparameter tuning and implementation details in favor of usability and implementation speed.

CRASSMAT: Conditional Random Sampling Sparse Matrices 2019
GitHub [Link] CRAN [Link]

A novel matrix sampling algorithm designed to conditionally random sample sparse matrices. Useful for training and test set splitting prior to model fitting in cross-validation procedures and for estimating the predictive accuracy of imputation methods, such as NNMF and SVD.

Mentorship Activities

Audrey Shin, B.S., Computer Science, Columbia University — New York, NY 2025 - 2026
Machine Learning Engineer Intern, ORO Labs
Professional development and management in early career engineering.

Albert Rosario-Pichardo, M.S., Urban Planning, Columbia University — New York, NY 2023 - 2024
GIS Analyst Intern, New York City Economic Development Corporation
Academic and professional development in early career public service.

Albert Ruiz Martinez, B.S., Computer Science, Arizona State University — Tempe, AZ 2023 - 2024
Analyst, Deloitte Consulting
Professional development and management in early career consulting.

Julia VanPutte, B.S., Operations Research, Cornell University — Ithaca, NY 2022 - 2024
Business Intelligence Engineer Intern, Amazon
Academic and professional development from undergraduate school to industry.

Chawner Hurd, M.B.A., Business, Columbia University — New York, NY 2020 - 2023
Associate Intern, Visa
Military transition from US Army, 5th Special Forces Group to graduate school and industry.

Michael Bollinger, B.A., Computer Science, Columbia University — New York, NY 2019 - 2023
Software Engineer Intern, Amazon
Military transition from US Army, 75th Ranger Regiment to undergraduate school and industry.

Daniel Hineline, B.A., Political Science, Columbia University — New York, NY 2018 - 2023
Associate Intern, Guggenheim Partners
Military transition from US Army, 82nd Airborne Division to undergraduate school and industry.
